Susan Leach

As a self-taught artist, I began my interest in creativity with pen & ink, photography and quilting. I enjoy the interplay of line that creates texture & movement. I went on to explore woodworking, woodcarving & watercolor. A good friend of mine, who happens to be a wonderfully gifted quilter, convinced me that I should try my hand at quilting again. She was a wonderful motivator, mentor & guidance counselor. Much to my husband's chagrin, I now have enough fabric, notions & gadgets in my working area to open my own quilt shop!

Recently I have been drawn to mosaics. A necessary home project that required us to lay 600 square feet of ceramic floor tile, convinced me that I really am not interested in mixing mastic & globbing on grout. When the possibility of using treated papers was brought to my attention, the bells started ringing & my creative juices started flowing. As I have played, practiced & investigated options, I am back to the endless possibilities provided by futzing around with fabric.

Inspiration comes from absorbing the details of Mother Nature's color palettes, watching color trends & walking in the door of a fabric shop & seeing all of those possibilities. I do not look for beautiful fabric, I look for beautiful colors. The way I mount papers & cut them, repetitively, determines the design of the end product. Even the same fabric looks different depending on how I approach it. This gives me the endless variations & possibilities that I love.

I don't think I will ever run out of ideas!

Product Information:

Dusting: A microfiber cloth will produce the best results.

Mirror cleaning: The finish on the mirrors must be protected from the chemicals found in glass cleaners. Spray your cleaning cloth with glass cleaner; do not spray the mirror. If the cleaning fluid drips behind the frame, it will degrade the finish.

Clocks: Clock mechanisms are guaranteed for one year with dated proof of purchase.

Shelf Units: Max Weight 5lbs

Humidity: Your SD Leach

product has two coats of sealer & two coats of polyurethane on both sides. High humidity may degrade the finish.

Orientation: The pieces may hang horizontal or vertical. I've picked a direction for display purposes only, you may change it to suit you needs.
